

SANJANA MUSHAM

Full Stack Developer | MEAN Stack

+91-9505905090 • sanjanamusham0103@gmail.com • linkedin.com/in/sanjana-musham333 • Hyderabad, India

PROFESSIONAL SUMMARY

Full Stack Developer with 1+ year of hands-on experience building production-grade SaaS web applications using the MEAN stack (MongoDB, Express.js, Angular, Node.js), REST API development, and MySQL-based BI reporting. Contributed to 200+ tickets across two full-stack projects and a client BI engagement, working across the full SDLC — UI development, REST API integration, security implementation, dashboard/report development, and technical documentation. Experienced in JWT authentication, role-based access control (RBAC) across 5 user roles, AES encryption/decryption, and responsive Angular UI design. Skilled in Agile SCRUM delivery and BI tooling (X-Plot, X-Report). Seeking Full Stack Developer or Angular Developer opportunities to contribute to scalable SaaS applications.

TECHNICAL SKILLS

Languages	JavaScript (ES6+), Typescript
Frontend	Angular 12+, Angular Material, RxJS, HTML5, CSS3, SASS/LESS, Bootstrap, Responsive Design, Cross-browser Compatibility
Backend	Node.js, Express.js, REST API Development, MVC/MV* Architecture, AJAX, JSON
Databases	MongoDB (Mongoose, Schema Design), MySQL
Security	JWT Authentication, Role-Based Access Control (RBAC), AES Encryption/Decryption, Payload Security
API & QA	RESTful API Integration, Postman, Unit Testing, E2E Testing, TDD, API Validation, Debugging
BI & Reporting	X-Plot, X-Report, MySQL-Based Dashboards, KPI Reporting, SJOT API Integration
Cloud & Tools	Git, GitHub, Bitbucket, VS Code, Agile SCRUM, AWS, CI/CD Concepts
Other	Technical Documentation, Excel Upload/Download, Bulk Data Operations, Lazy Loading, Web Accessibility, System Design

PROFESSIONAL EXPERIENCE

Software Engineer | SUN KPO Systems LLP

Sep 2025 – Jun 2026

- Contributed to **25+ UI feature enhancements** for SaaS-based cloud-ready web applications using **Angular and Typescript**, integrating REST APIs and JSON data structures across 10+ business modules
- Implemented end-to-end **AES encryption/decryption across 60+ Node.js backend services** — securing API payloads, IDs, and response data to prevent data exposure across all modules
- Contributed to BI development for client **Df-OS** — built **2 interactive KPI dashboards** and supporting reports using X-Plot and X-Report with optimized MySQL queries, enabling real-time business decision support
- Contributed to full module delivery across Units, Services, My Services, Vendor, and Invoice — covering UI screens, backend API integration, RBAC, **pagination, bulk operations, and Excel download**
- Authored comprehensive **technical documentation** including API module specs, release notes, PPT user manuals, and onboarding workflows, improving team knowledge transfer and development efficiency
- Collaborated with cross-functional teams across **Agile SCRUM** sprint planning, reviews, and retrospectives, and participated in peer code reviews to enforce coding standards across release cycles

Trainee Software Engineer | SUN KPO Systems LLP

Apr 2025 – Sep 2025

- Built and maintained **2 full-stack web applications** — **Sun Portal** (HR Management) and **Konnect@Properties** (Property Management) — using Angular, Typescript, Node.js, and Express.js across the full SDLC
- Designed and built **30+ RESTful APIs** using Node.js and Express.js with AJAX integration; wrote unit tests and performed end-to-end debugging to validate JSON data structures and response payloads
- Implemented **JWT-based authentication and RBAC** across 5 permission roles (Super Admin, Admin, Project Manager, HR, Employee), achieving **zero unauthorized access incidents** post-launch

- Built responsive UI screens across 4 core screen types using **HTML5, CSS3, SASS, and Bootstrap**; applied lazy loading to improve Angular performance; validated cross-browser compatibility using Chrome Dev Tools
- Contributed to multi-role features including role-specific screens, column filters, search, **pagination, bulk delete/save**, and Excel upload/download functionality across both projects
- Performed API testing and validation using **Postman**; participated in all SDLC phases — requirement analysis, development, code review, QA test case writing, and UAT — within Agile sprint cycles

PROJECT PROFILE

Sun Portal — HR Management System (Internal SaaS Application)

Tech Stack: Angular, Typescript, Node.js, Express.js, MongoDB, Bootstrap, HTML5, CSS3, SASS, REST APIs, JWT, Git, Postman

- Worked on **180+ tickets** across 15+ modules including Employee Lifecycle, Leave, Attendance, Payroll, Reimbursement, Vendor, Invoice, Assets, Projects, Customers, Tasks, Dashboard, and Masters
- Built **30+ RESTful APIs** and designed MongoDB schemas using Mongoose for 5+ core entities (employee records, leave logs, payroll, on boarding, workflow metadata) supporting 50+ concurrent users
- Implemented JWT authentication and RBAC across 5 roles; implemented **AES encryption/decryption across 60+ backend services** to secure all API payloads, IDs, and responses — zero unauthorized access incidents post-launch
- Implemented **bulk data operations** including CSV/Excel upload for holiday and leave records; built Excel export functionality for employee, project, customer, vendor, and invoice modules with correct formatting
- Contributed to BI dashboards for client Df-OS using **X-Plot and X-Report** with optimized MySQL queries; assisted in SJOT API integration for dynamic reporting and real-time KPI visualization
- Implemented dependency-check logic before delete operations across master modules; built reactivation workflows, **multi-select dropdowns**, and role-based access patterns throughout the application

Konnect@Properties — Property Management Platform (Internal SaaS Application)

Tech Stack: Angular, Typescript, Node.js, Express.js, MongoDB, HTML5, CSS3, SASS, REST APIs, Git, Postman

- Contributed to **130+ tickets** across Units, Properties, Service Requests, Service Types, Service Categories, My Services, and Users modules — from mock screen design through backend API integration
- Implemented **role-based access for 5 roles** (KP Super Admin, Property Admin, Property Manager, Owner, Tenant) with role-specific list screens, CRUD operations, column filters, search, and pagination per module
- Built backend APIs for property listings, unit management, service requests, and user profiles; integrated **third-party APIs** for notifications and communication using AJAX-based REST calls
- Built **Select Your Services** tab with checkbox bulk-save, My Services tab CRUD, bulk delete, column filters, and Request New Service Category workflow for the Property Manager role
- Implemented **unique ID generation** for units, gallery upload/preview for property media, **Excel download (role-wise)**, and delete dependency popup functionality; optimized MongoDB queries and used lazy loading to improve load times across all 4 core screen types
- Designed mock screens in PPT for all modules; wrote test cases in Excel for all 4 roles; produced release notes for v2.0 build series with build-over-build change tracking; managed code with Git using a PR-based branching workflow

Df-OS — BI Dashboards & Reports (Client Project)

Tech Stack: MySQL, X-Plot, X-Report, Df-OS App

- Developed the **Hero-NPD Dashboard** using X-Plot with optimized MySQL queries to extract and visualize key KPI data for real-time business decision support
- Built interactive reports using **X-Report** with custom MySQL queries for business data analysis, enabling both real-time and scheduled report generation
- Implemented **SJOT API integrations** to connect data sources and enable dynamic reporting within the Df-OS platform
- Validated dashboard outputs and report accuracy through data cross-checks and iterative client feedback cycles; translated business reporting requirements into accurate, production-ready deliverables

EDUCATION

Bachelor of Technology (B.Tech) — Electrical & Electronics Engineering

2021 – 2024

Jawaharlal Nehru Technological University Hyderabad (JNTUH)

Diploma — Electrical & Electronics Engineering

2018 – 2021

Government Polytechnic for Women, SDPT

CERTIFICATIONS

- Analyze and Visualize Looker Data — Skill Badge, **Google Cloud**

CORE STRENGTHS

- **Full SDLC involvement:** requirement analysis, frontend development, REST API integration, security implementation, QA test writing, documentation, and release notes within Agile SCRUM sprint cycles
- **Security-aware development:** AES encryption/decryption across 60+ backend services and RBAC with JWT across 5 roles — strengthening application security and access control
- **BI & analytical problem-solving:** strong ability to translate business reporting requirements into accurate dashboards/reports, with a track record of diagnosing issues and proposing scalable technical solutions
- **Cross-functional delivery:** PPT user manuals, Excel test cases, API documentation, and release notes alongside development — improving team on boarding and knowledge transfer
- **Adaptable, high-throughput learner:** Quickly on boarded onto BI tooling (X-Plot, X-Report, MySQL), AES encryption, and SaaS architecture patterns
